**?? CONTENT CREATORS**

-Video Editing: Optimized for DaVinci Resolve, Adobe Premiere Pro, and After Effects. Smooth 4K playback and snappy timeline performance thanks to 32GB of RAM and 16GB of VRAM.

-3D Rendering: The 16GB RX 9060 XT provides the massive memory buffer needed for complex Blender scenes and high-resolution textures that would crash 8GB cards.

-Streaming: Multitask effortlessly with 12-cores/24-threads—stream in high quality while gaming or rendering without frame drops.

**?? GAMERS**

-Performance: Run modern AAA titles (Cyberpunk 2077, Warzone) at High/Ultra Settings. Experience smooth, competitive gameplay with 80 - 100 FPS average at 1440p resolution.

-Future-Ready: The 16GB of VRAM ensures you won't be forced to lower texture settings in next-gen games coming out in 2026 and beyond.
